

**Roadmap:**  
2021 and beyond

## Historically, CHI NL has played a role in promoting Human Computer Interaction Research and its application in the Netherlands

### Most visibly through:

- Conferences such as CHI Sparks and The Web and Beyond
- Smaller themed meetings
- The ‘Gerrit van der Veer’ thesis prize (‘Scriptieprijs’)
- Being a local chapter for SIG CHI (until 2010)

CHI NL has gone through a period of lessened activity, whereby the landscape of HCI research and practice, and the way it has been self organising, changed.

In **revitalizing CHI NL**, the new board has taken the opportunity to **'rethink' the vision and mission for CHI NL**

- Board underwent an inception period of six months
- During this period, members and outsiders were invited to share their ideas
- Members can (still) express their interest in being active in CHI NL

# Goals of CHI NL

To **connect** professionals in HCI in and (particularly) across academia and industry.

To **support** professionals in HCI in academia and industry.

To **represent** HCI professionals in relevant circles (such as government and public perception of HCI).

# Connect
